

## THE COLLEGE

The K.S. Rangasamy College of Arts and Science is a well established one among the KSR Educational Institutions. It is situated in a salubrious and serene campus of 350 acres, 8 kms from Tiruchengode. The college has been started with the laudable idea of providing educational facilities of the highest order to achieve excellence in academics and to create socially responsible citizens with strong character and great qualities of leadership in all walks of life. The institution is an ISO 9001:2000 (E) certified institution for its quality education and accredited by National Assessment Accreditation Council (NAAC) for its academic excellence.

## THE DEPARTMENT

Department of Microbiology was established in the year 1995 to disseminate the knowledge and promote quality research and extension activities by offering UG, PG, M.Phil and Ph.D programmes. The academic excellence of the department is coupled with the experienced faculty members and enthusiastic students. The department has all the basic facilities and other infrastructure for the programmes. The department also supports research and industrial projects and conducts annual workshops, seminars and conferences for disseminating information on the latest developments in the field of life sciences, towards educating and training the future microbiologists to cater the needs of the society.

## THEME OF THE SEMINAR

Environmental pollution today is an overwhelming issue occurring throughout the country. The present seminar is organized to concentrate specifically on current research advancements and achievements in combatting the ill effects of textile dye effluents and its related impacts on environmental and human health. The focus has been aimed to get achieved by invited lectures and paper presentations by leading young scientists and budding researchers across the country. The seminar is expected to be a platform for the conglomeration of the ideas for the rehabilitation of the environment.

## THEME AREAS

The seminar will host the sessions under the following theme areas

- Textile dye effluents and human health
- Microbial community analysis in polluted site
- Bioremediation technology
- Water borne diseases through polluted water
- Dye effluents and environmental issues

## DATE AND VENUE

The seminar is proposed to be held at the premises of K.S. Rangasamy College of Arts and Science, Tiruchengode, Namakkal District, Tamil Nadu during February 15 & 16, 2012.
